

CHEMetrics Talks Peracetic Acid with the Words on Water Podcast

Listen to episode #178 of the Words on Water podcast to hear CHEMetrics R&D Director Joanne Carpenter and Katie Bell of Brown and Caldwell discuss the rise of peracetic acid and how it has become a disinfection alternative to UV and chlorine at water resource recovery facilities. Thanks to the Water Environment Federation (WEF) for producing another great episode. Don't forget to check out our [peracetic acid test kits](#) for your testing needs.
